EMIS: European Men-who-have-sex-with-men Internet Survey 2017

Welcome to the world’s largest survey of gay men, bisexual men and other men (including trans men) who are attracted to men. (EMIS2017)

Please take part if you are...
- a man who has sex with men
- or a man who is attracted to other men
- or a man who thinks he might have sex with men in the future.

You must be old enough to legally have sex in the country where you live.

What is it about?
It asks about relationships, sex life, risks and precautions, and use of health services.

How long will it take?
Most men take between 15 and 25 minutes to complete it. Please make sure you have enough time and battery power, because you cannot come back to complete it if you log off. However, the survey is voluntary and you can stop and withdraw at anytime. None of the data you supplied will be collected if you do this. Please complete this survey ONLY ONCE this year.

Why should I take part?
Because we all want better sex with less harm. By taking part you might find out something new. Although there will be no direct benefit to you from the information you provide, it will help health and social services to better meet the communities needs. It could also mean that services for gay and bisexual men are funded. Our first version of this survey (in 2010) recruited 181,000 men.

Who is running it?
The survey is being run by Sigma Research in the UK and has been approved by the ethics committee of the London School of Hygiene & Tropical Medicine (University of London).

It has been developed with an international group of researchers and health workers in public health institutes, universities and non-governmental organisations working in HIV, gay health and human rights, from over 40 European countries.

The survey is funded by the European Commission Health Programme 2014-2020 to deliver evidence about the sexual health of gay men, bisexual men and other MSM across Europe. It is supported by the European Centre for Disease Prevention and Control, and many national and international gay organisations and websites.

You can get more information about the survey at www.esticom.eu

What about data protection?
We will not collect the TC/IP-address of your device or try to install any cookies on it. We will not collect any information about you that would allow anybody to identify you. This means you need to complete the survey in one session and you cannot log out and return later. Participation is voluntary and you can withdraw at any time.

Where will the data go?
The anonymous data will be shared with EMIS academic and community collaborators in participating countries as soon as it is ready. Eventually it will be placed in the European Union Open Data Portal for the use of other researchers after a period of embargo.

When can I see the results?
Results will available after mid 2018 in different formats and languages. They can be accessed at the project’s website at www.esticom.eu

Please complete this survey ONCE ONLY this year.

EMIS 2017 (EMIS: English language version)
Most sexually transmitted infections can be passed on more easily than HIV.

Because they sometimes have no symptoms, people can have sexually transmitted infections without knowing it.

The correct use of condoms throughout intercourse reduces the likelihood of picking up and passing on STIs (including HIV).
