

Executive Summary

In the first three months of 2013-14 the HIV Prevention England Local Delivery Partners (LDPs) reported **572** different interventions to support the recently launched *It Starts With Me* (ISWM) national programme of HIV health promotion. These 572 interventions reached 7900 people and tested 801 people.

The most common intervention was [1-2-1 information and advice](#) (also known as outreach, 186 sessions reaching 6076 people). The vast majority of [1-2-1 information and advice](#) sessions occurred face-to-face (only 4% were online). They usually lasted 2-3 hours, occurred in community venues and involved staff and / or volunteers providing short (3-5 minute) face-to-face interventions to people concerning information about HIV, its transmission, and prevention. Some touched on other sexually transmitted infections but most focussed on increasing awareness of the benefits of HIV testing and the benefits of knowing your status.

The next most common intervention was [motivational interviewing](#). 181 MI sessions were delivered by 10 LDPs and reached 254 people. Since MI has only been added to the programme in this quarter there was substantial variation in the ways in which it was delivered.

[Group information and advice \(outreach or centre based\)](#) was reported by 15 LDPs, but was far more common among those serving African rather than gay communities. 45 group information and advice sessions reached 840 with sessions mainly occurring in the premises of the agency delivering them, with some held in other community settings. Most covered very similar topics to the 1-2-1 information and advice with more focus on skills acquisition (assertiveness, disclosure, condom demonstration) and less on service promotion.

Most of the remaining HIV Prevention England interventions were either therapeutic (1-2-1 or group) in nature or provided opportunities to test for HIV in the community. Testing opportunities were offered in [community clinics](#) (in organisations, saunas and churches for example); or at other community events. Overall, 10% of all people encountering an HPE intervention in Q1, were tested for HIV during that interaction (801 people out of 7,900), not including the HPE home sampling intervention offered nationally from an online hub.

Format of this report

The tables on pages 2 and 3 summarise all the interventions reported by African and MSM Local Delivery Partners in quarter 1 of 2013-14. Where a column is split in half, the numbers on the left show the number of sessions of that intervention, and the numbers on the right show the number of people reached.

Pages 4 -7 summarise all 1-2-1 information and advice provision across the partnership in Q1.

Pages 8 -11 summarise all group information and advice across the partnership in Q1.

Pages 12-15 summarise all Event-based interventions, including testing based events and condom distribution events.

Pages 16-19 summarise all HIV testing sessions offered apart from during events. Most occurred in the office of the providing organisations, with others at churches, saunas and bars.

Pages 20-21 summarise all other HIV testing occurring as part of HPE> Most of these monthly reports are of testing opportunities offered on an open access basis, via the offices of the service provider.

Pages 22-23 summarise all the motivational interviewing offered by ten LDPs in Q1.

Pages 24-25 summarise all the 1-2-1 therapeutic interventions offered by LDPs in Q1.

Pages 26-29 summarise the group therapeutic interventions offered by LDPs in Q1.

Pages 30-31 summarise all the distribution interventions occurring in Q1. None of the LDPs are funded to distribute ISWM interventions.

Pages 32-33 summarise the local development and engagement (D&E) activities of the LDPs.
