

What do you need? 2007-08

A UK-wide survey of people with diagnosed HIV

Area Sub-samples data report (March 2009)

London Strategic Health Authority (n=760)

This report uses data from the UK *What Do You Need? Survey 2007-08*, conducted by Sigma Research in collaboration with 110 charitable AIDS Service organisations and HIV out-patient clinics, care agencies and health promoters throughout the UK. It supplements the main survey report which is available at www.sigmaresearch.org.uk/go.php/reports/report2009b/. Survey methods and interpretation of the variables are outlined in that report.

This data is intended to provide HIV service planners with information about their local population of people with diagnosed HIV. This report contains data from people who live in the London SHA and for whom Primary Care Trust (PCT) area of residence is known. Respondents are grouped according to the PCT area in which they live.

There are whole country reports for England, Wales and Scotland. There are also individual data reports for each Strategic Health Authority (SHA) in England which had 20 or more responses from one or more of their PCTs, with people grouped according to their PCT of residence. All these reports are available at: www.sigmaresearch.org.uk/go.php/local/hiv/wdy08

The data

The survey used two data collection methods over seven months from 5th June 2007 until 5th January 2008: a self-sealing, Freepost addressed booklet distributed by clinics and AIDS service organisations; and via a specific website promoted via links on AIDS service organisation websites. The web version was made available in both English and French.

This report contains data from all the people recruited through both methods. To be included in the sample respondents had to: be aged 16 or over; be living in the UK; have diagnosed HIV infection. Differences between the number of surveys returned and the number of people who appear in the sample are due to these exclusions.

The tables

Groups of people living in the same PCT appear as a row (horizontal line) in the tables. The bottom row of each table gives the result for all people living in the SHA. PCT areas with fewer than 20 people in the sample are reported as "all other people". Some adjoining PCT areas are amalgamated where respondents cannot be allocated to an individual PCT area. The tables show the proportions (%) of each sub-sample for that variable (less missing data). Rows add up to 100%. The only exception to this layout is table 4, Age averages.

Questionnaires

The contents page identifies the Booklet question number (Q) each table is derived from. The questionnaire used in the survey is available to download at: www.sigmaresearch.org.uk/files/WDYN2007.pdf

Funding

The survey was funded by Terrence Higgins Trust and the Department of Health. Recruitment occurred in England, Wales, Scotland and Northern Ireland.
