

# Vital Statistics 2007 The UK Gay Men's Sex Survey

## Area Sub-samples Data Report (January 2009: Version 2)

### East Midlands Strategic Health Authority (n=313)

**Important Note:** This report supercedes the GMSS'07 local data reports released in August 2008. Subsequent to that release of data we identified a problem with a number of cases which we believe to have been falsified. The false cases seemed to be an attempt to systematically skew the findings in a particular area of the survey, but provided incomplete data in other areas. In order to exclude as many of these false cases as possible, while retaining valid cases, we tightened the inclusion criteria and excluded all cases missing responses for any of 31 survey items. This resulted in the loss of 29% of all cases, which accounts for the reduction in cases in the report compared with the earlier data release. This has been necessary for us to continue to have confidence in the data that remains.

This report uses data from the UK *Gay Men's Sex Survey* 2007, conducted by Sigma Research in collaboration with health promoters throughout the UK. It supplements the main survey report which will be published in April 2009. Survey methods and interpretation of the variables will be outlined in that report.

This data is intended to provide HIV health promotion planners with information about their local population of gay men and bisexual men. There is a data report for each Strategic Health Authority (SHA) in England, with men grouped according to their Primary Care Trust (PCT) of residence. There are also whole country reports for England, Wales, Scotland, Northern Ireland and the Republic of Ireland, with men grouped according to their region of residence. These, and similar reports for previous years, are available at: [www.sigmaresearch.org.uk/go.php/local/gay](http://www.sigmaresearch.org.uk/go.php/local/gay)

#### *The data*

The survey used two data collection methods over the summer of 2007: a self-sealing, Freepost addressed booklet distributed by health promotion agencies; and via a specific website promoted via links on gay and HIV-related websites.

This report contains data from all the men recruited through both methods. To be included in the sample respondents had to: be male; be aged 14 or over; be living in the UK; have had sex with a man in the last year or have a gay, bisexual or other "queer" identity; have completed at least one demographic question and one other question.

Differences between the number of surveys returned and the number of men who appear in the sample are due to these exclusions.

#### *The tables*

Groups of men living in the same PCT appear as a row (horizontal line) in the tables. The bottom row of each table gives the result for the entire SHA. The first table shows the number of men recruited to the survey living in PCT areas and the size of the sub-samples in the rest of the tables. PCT areas with fewer than 20 men in the sample are reported as "all other men". Some adjoining PCT areas are amalgamated where respondents cannot be allocated to an individual PCT area. The tables show the proportions (%) of each sub-sample for that variable (less missing data). Rows add up to 100%. The only exception to this layout is table 3, Age averages.

#### *Questionnaires*

The contents page identifies the Booklet question number (Q) each table is derived from. The questionnaire used in the survey is available to download at: [www.sigmaresearch.org.uk/files/VS2007booklet.pdf](http://www.sigmaresearch.org.uk/files/VS2007booklet.pdf)

#### *Funding*

The survey was funded by Terrence Higgins Trust as part of CHAPS, a national HIV prevention initiative funded by the English Department of Health and the National Assembly for Wales. Online recruitment occurred in England, Wales, Scotland, Northern Ireland and the Republic of Ireland. Booklet recruitment occurred in England and Wales.

## Table Contents

### **SAMPLE DESCRIPTION**

- 1a. Primary Care Trust (PCT) area of residence.
- 1b. Web and booklet sample sizes by PCT area of residence.
2. Age groups; Q5 grouped into ten year age bands.
3. Age averages; from Q5; the median age (line them up by size and pick the one in the middle), the minimum (youngest) and maximum (oldest) ages, the mean age (add them up and divide by how many there are), and the standard deviation (a measure of how spread out along the range they are).
4. Ethnicity in 6 groups; from Q6.
5. Sexual identity; Q48.
6. Gender of sexual partners in the last year; Q16.
7. Marriage / civil partnership status; Q4.
8. Sero-discordancy with male regular partner; Q9.

### **HIV TESTING & HEPATITIS SUSCEPTIBILITY**

9. HIV testing history; Q7.
10. Hepatitis B susceptibility; Q12.
11. Hepatitis A susceptibility; Q14.

### **SEXUAL BEHAVIOUR**

12. Number of male sexual partners in the last year; Q17.
13. Met new male sexual partner/s in last year (among those who had any male partners); Q20.
14. Unprotected anal intercourse (UAI) in the previous year, with partners whose HIV status was unknown or discordant; Q24+Q25+Q28+Q29.
15. Perceived HIV transmission risk in the last year (for all men); Q21.

### **HEALTH NEEDS**

16. Ever heard of PEP; Q33.
17. Any concern about your alcohol use; Q32.
18. Any concern about your drug use; Q32.
19. *I would sometimes rather risk HIV transmission than use a condom;* Q39a.
20. *I can talk to my friends about safer sex and HIV;* Q39b.
21. *I have someone to talk to if I'm worried about safer sex and HIV;* Q39c.
